About the data
The data on fuel prices are compiled by the German Agency for Technical Cooperation (GTZ) from its global network of regional offices and representatives as well as other sources, including the Allgemeiner Deutscher Automobil Club (for Europe). Local prices have been converted to U.S. dollars using the exchange rate on the survey date as listed in the international monetary table of the Financial Times. For countries with multiple exchange rates the market, parallel, or black market rate was used rather than the official exchange rate.
